

Example of Easy Gif Animator to make movies from stacks

Ni-hi-C-A190713014-NiL.gif

1. In stack_process, open stack and set up spectrum (here, single pixel in Ni-catalyst)
2. click ' movie *.mgif
3. Yes (include spectrum), No (do not delete gif files)
4. FIND gif files (almost always not in the directory of the stack, typically in c:\axis2000 OR last but 1 folder you used axis in

Easy Wizards

Create New Animation

- 5 start Easy gif animator
- 6 load set of gif's (use wizard)
7. select time/image 100 – 1sec; I used 25
8. To pause on a peak/energy right click and duplicate the image
- 9 save as –NAME.gif extension is *.gif but it is a movie NOT a single image
- 10 insert into powerpoint.
11. will play in slide show mode.
12. Use custom animation to control repeat or hide etc.
